

AWT UNIT 2 @ UNIT 3 SUBMISSION

Roll No : 47

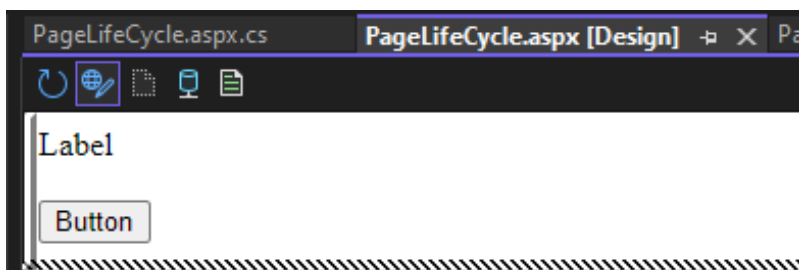

Batch – A3

Unit 2

Introduction to ASP.Net

Practical 1: Design ASP.NET web page to demonstrate page life cycle

Code -

PageLifeCycle.aspx.cs

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;

namespace Unit2AWT1
{
    public partial class PageLifeCycle : System.Web.UI.Page
    {
        protected void Page_PreInit(object sender, EventArgs e)
        {
            Label1.Text = Label1.Text + "<br/>" + "This is Page Pre Init method...";
        }
    }
}
```

```
protected void Page_Init(object sender, EventArgs e)
{
    Label1.Text = Label1.Text + "<br/>" + "This is Page Init method...";
}
```

```
protected void Page_InitComplete(object sender, EventArgs e)
{
    Label1.Text = Label1.Text + "<br/>" + "This is Page Init Complete method...";
}
```

```
protected override void OnPreLoad(EventArgs e)
{
```

```
Label1.Text = Label1.Text + "<br/>" + "This is On PreLoad method...";
}
```

```
protected void Page_Load(object sender, EventArgs e)
{
    Label1.Text = Label1.Text + "<br/>" + "This is Page Load method...";
}
```

```
protected void Page_LoadComplete(object sender, EventArgs e)
{
    Label1.Text = Label1.Text + "<br/>" + "This is Page Load Complete method...";
}
```

```
protected override void OnPreRender(EventArgs e)
{
    Label1.Text = Label1.Text + "<br/>" + "This is On Pre Render method...";
}
```

```
protected void Page_Unload(object sender, EventArgs e)
{
    Label1.Text = Label1.Text + "<br/>" + "This is Page Unload method...";
}
```

```
protected void Button1_Click(object sender, EventArgs e)
{
    Label1.Text = Label1.Text + "<br/>" + "This is button click event...";
}
}}
```

Output:

Label

This is Page Pre Init method...

This is Page Init method...

This is Page Init Complete method...

This is On PreLoad method...

This is Page Load method...

This is Page Load Complete method...

This is On Pre Render method...

This is On PreLoad method...

This is Page Load method...

This is button click event...

This is Page Load Complete method...

This is On Pre Render method...

Button

Practical 2: Design a Student Registration form using Web Server Controls

Form1.aspx (Design)

Form1.aspx.cs Form1.aspx [Design] Form1.aspx* PageLifeCycle.aspx.cs

Welcome to BVIMIT!!!
Hello all!!

Student Registration Form

Student Name:

EmailId:

Password:

Gender: ☐ Male ☐ Female

Date Of Birth:

April 2023						
Sun	Mon	Tue	Wed	Thu	Fri	Sat

Code:

```
using System;
using System.Collections.Generic;
using System.Linq; using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;

public partial class cal : System.Web.UI.Page
{
    protected void Page_Load(object sender, EventArgs e)
    {
        Label2.Text = "Todays Date is: " + Calendar1.TodaysDate.ToShortDateString();
    }
    protected void Calendar1_SelectionChanged(object sender, EventArgs e)
    {
        Label1.Text = Calendar1.SelectedDate.ToLongDateString();
    }
    protected void Calendar1_DayRender(object sender, DayRenderEventArgs e)
    {
        if (e.Day.Date == new DateTime(2021, 2, 14))
```

```

{
    Literal l1 = new Literal();
    Image img1 = new Image();
    e.Cell.Width = 70;
    e.Cell.Height = 70;
    e.Cell.Font.Italic = true;
    e.Cell.Font.Size = FontUnit.XLarge;
    e.Cell.BackColor = System.Drawing.Color.LightPink;
    img1.ImageUrl = "~\\1.jpg";
    img1.Width = 30;
    img1.Height = 30;
    l1.Text = "<br /><font size=2 color=Red>Holiday</font>";
    e.Cell.Controls.AddAt(1, l1);
    e.Cell.Controls.AddAt(0, img1);
}
}
protected void Calendar1_VisibleMonthChanged(object sender, MonthChangedEventArgs e)
{
    Label3.Text="Selected Month & Year is: " + e.NewDate.Month + "-" + e.NewDate.Year;
}
}

```

Output:

Label

Today's Date is: 28-05-2021

February 2021						
Mon	Tue	Wed	Thu	Fri	Sat	Sun
25	26	27	28	29	30	31
1	2	3	4	5	6	7
8	9	10	11	12	13	14 <i>Holiday</i>
15	16	17	18	19	20	21
22	23	24	25	26	27	28
1	2	3	4	5	6	7

Selected Month & Year is: 2-2021

Practical 6: Design ASP.NET web page to demonstrate File Upload control

File Upload Control:

The screenshot shows a web page titled "File Upload Control". It contains two distinct upload sections. The first section has a "Select File" label, a text input field, a "Browse..." button, and a "Label" placeholder. Below this is an "upload" button and another "Label". The second section is titled "Upload Only Doc File" and includes a document icon, a text input field, a "Browse..." button, an "Upload doc" button, and a "Label".

Code:

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;
using System.IO;

public partial class fileupload : System.Web.UI.Page
{
    protected void Page_Load(object sender, EventArgs e)
    {
    }
    protected void Button1_Click(object sender, EventArgs e)
    {
        if (FileUpload1.HasFile)
        {
            FileUpload1.SaveAs(Server.MapPath("~/img/") + FileUpload1.FileName);
            path.ImageUrl = "~/img/" + FileUpload1.FileName;
            Label2.Text = "Image Uploaded Successfully !!";
        }
        else
        {
            Label3.Text = "Select image first !!";
        }
    }
}
```

```

protected void Button2_Click(object sender, EventArgs e)
{
    string fn = Path.GetFileName(FileUpload2.PostedFile.FileName);
    string fextn = Path.GetExtension(fn);
    int size = FileUpload2.PostedFile.ContentLength;
    if (FileUpload2.HasFile)
    {
        if (fextn.ToLower() != ".doc" && fextn.ToLower() != ".docx")
        {
            Labelmsg.Text = "only doc and docx file allowed";
        }
        else if (size < 10024)
        {
            Labelmsg.Text = "file should be less than 1mb";
        }
        else
        {
            FileUpload2.SaveAs(Server.MapPath("~/Upload/" + fn));
            Labelmsg.Text = "file uploaded";
        }
    }
    else
    {
        Labelmsg.Text = "please select file before uploading";
    }
}

```

Output:

Practical 7: Create a website using master page concept

master1.Master

```
<% @ Master Language="C#" AutoEventWireup="true" CodeBehind="master1.master.cs"
Inherits="masterpg.master1" %>
<!DOCTYPE html>
<html>
<head runat="server">
<title></title>
<asp:ContentPlaceHolder ID="head" runat="server">
</asp:ContentPlaceHolder>
</head>
<body>
<center>
<form id="form1" runat="server">
<div style="background-color:gainsboro">
<h1 style="height:50px">BVIMIT</h1>
<p style="height:250px">
<asp:Image ID="img1" runat="server" Height="200px" width="200px"
ImageUrl="Images/bvimitlogo.jpg" />
</p>
<asp:ContentPlaceHolder ID="ContentPlaceHolder1" runat="server">
</asp:ContentPlaceHolder>
</div>
</form>
</center>
</body>
</html>
```

Design:

```
<%@ Page Language="C#" AutoEventWireup="true" CodeBehind="ContentPage.aspx.cs"
Inherits="masterpg.ContentPage" MasterPageFile="~/master1.Master" %>
```

```
<asp:content ID="Content1" ContentPlaceHolderID="head" runat="server">
```

```
</asp:content>
```

```
<asp:content ID="Content2" ContentPlaceHolderID="ContentPlaceHolder1" runat="server">
```

```
<asp:Label ID="Label1" runat="server" Text="Enter your name: " Font-Names="Bauhaus 93" Font-
Size="16pt"></asp:Label>
```

```
<br /><br />
```

```
<asp:TextBox ID="Textbox1" runat="server" Height="50px" Width="300px" Font-Names="Ravie"
Font-Size="14pt"></asp:TextBox>
```

```
<br /><br />
```

```
<asp:Button ID="Button1" runat="server" Text="Submit" Height="53px" Font-Names="Broadway"
Font-Size="16pt" OnClick="Button1_Click" />
```

```
</asp:content>
```

Design:

The screenshot displays a web application interface. At the top, the text "BVIMIT" is centered. Below it is a logo for "BHARATI VIDYAPEETH'S BVIMIT NAVI MUMBAI". The main content area, labeled "asp:content#Content2", contains a form. The form has a label "Enter your name:" followed by a text input field. Below the input field is a "Submit" button.

ContentPage.aspx.cs

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;

namespace masterpg
{
    public partial class ContentPage : System.Web.UI.Page
    {
        protected void Page_Load(object sender, EventArgs e)
        {}

        protected void Button1_Click(object sender, EventArgs e)
        {
            Label1.Text = "You have entered " + Textbox1.Text;
            Label1.Visible = true;
        }
    }
}
```
